Johannes Kepler Research Center Regensburg  
a Workshop of the DFG Research Group 570 “Algebraic Cycles and \( L \)-Functions” Regensburg/Leipzig  
“Algebraic cycles, motives  
and \( \mathbb{A}^1 \)-homotopy theory over general bases”  
Regensburg, February 13–16, 2007  
Organizers: Jens Hornbostel (Regensburg), Alexander Schmidt (Regensburg)

| 10:00-11:00 | Shuji Saito (Tokio)  
*The Chow group of zero cycles over a \( p \)-adic field with infinite torsion subgroup* | Marc Levine (Boston)  
*Additive Chow groups for schemes and motives* | Kirill Zainoulline  
(München)  
*The motivic splitting lemma* |
| Room: M 104 |  |  |  |
| 11:00-11:30 | Coffee break (Room: M 103) |  |  |
| 11:30-12:30 | Thomas Geisser (Los Angeles)  
*Higher Chow groups over Dedekind rings (a survey)* | Joseph Ayoub (Paris/Princeton)  
*Perverse homotopy t-structures and Rost modules* | Matthias Wendt  
(Leipzig)  
*Fibrations and homotopy principles in \( \mathbb{A}^1 \)-homotopy theory* | Uwe Jannsen  
(Regensburg)  
*Finiteness of motivic cohomology and resolution of singularities* |
| Room: M 104 |  |  |  |
| 12:30-14:30 | Lunch time |  |  |
| 14:30-15:30 | Frédéric Déglise (Paris Nord)  
*Motivic cohomology over the ring of integers* | Florian Ivorra  
(Duisburg-Essen)  
*l-adic realization of triangulated motives over a noetherian separated scheme* | José Malagón López  
(Boston)  
*Adams operations on algebraic cobordism* | Annette Huber  
(Leipzig)  
*A \( p \)-adic Borel regulator* |
| Room: M 104 |  |  |  |
| 15:30-16:00 | Coffee break (Room: M 103) |  |  |
| 16:00-17:00 | Denis-Charles Cisinski  
(Paris Nord)  
*Comparing mixed Weil cohomology theories using the homotopy theory of schemes* | Alexander Schmidt  
(Regensburg)  
*On the \( K(\pi,1) \)-property for rings of integers* | Shouxin Dai  
(Boston)  
*Algebraic cobordism and \( K \)-theory over singular schemes* | Bruno Kahn  
(Paris/Jussieu)  
*Indecomposable \( (2,1) \)-cycles and the Brauer group* |
| Room: M 104 |  |  |  |

Workshop dinner: Thursday, February 15, 19:00
